

Rubber & Polyurethane Pipe Spacers

CUSTOM MOLDED RUBBER & POLYURETHANE PIPE SPACERS.

Pipe Spacers, commonly referred to as casing spacers, help center various types of piping while keeping it in place. Without these tools, the pipe integrity could easily be compromised, due to movement, friction, and damage by external pressures and elements.

Mark Tool Company, Inc. is one of the few companies that have the experience and capability to manufacture both custom molded Polyurethane and rubber products at the same facility. We are the leading manufacturer of custom molded Rubber and Polyurethane pipe spacers. Our core focus began with various oilfield and marine applications but has grown to meet the needs of virtually every industry. We have over 50 years of experience in the industry. We have manufactured countless rubber and urethane pipe spacers and other products used in many industries worldwide.

POLYURETHANE SPACERS:

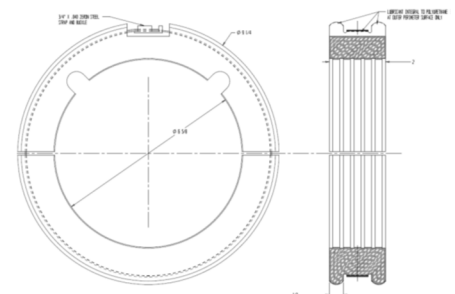

Our polyurethane pipe spacers are made of durable castable polyurethane they can be installed in the field using nylon Smart bands as seen in the photo above, or stainless banding. For maximum strength, an epoxy adhesive can be applied during the field application. They are excellent for underwater pipelines when pipes need to be a certain distance from each other or for underground pipelines.

RUBBER SPACERS:

Our rubber pipe spacers are made of SPLASHTRON these spacers are manufactured to the same high-quality standards as other SPLASHTRON products. They also can be installed in the field using nylon Smart bands as seen in the photo above, or stainless banding. For maximum strength, an epoxy adhesive can be applied during the field application. Also as seen in the top left photo pipe can be coated with SPLASHTRON for corrosion protection, and spacers can be vulcanized in place wear bundled pipelines need to be a certain distance from each other or for underground pipelines.

INTENDED USE:

- Pipeline bundles
- Horizontal drilled crossings
- River crossings
- Road crossings
- Pipe centralizers
- Pipe transportation
- Pipe storage
